ABOUT NANO SINK OUTLET

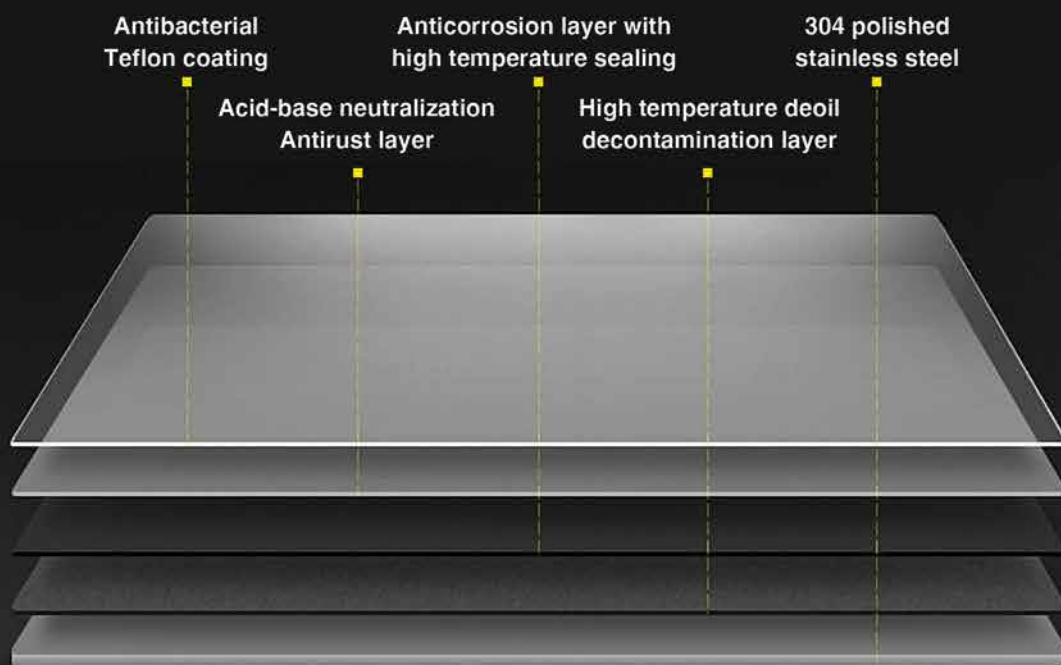

Why do you want to produce a sink by hand ?

为什么要手工生产水槽？

High quality and high thickness sink, the thickness of handmade sinks is generally 1.2-4.0mm. This kind of thickness cannot be made by machine, and only be made by hand.

高质量，高厚度的水槽，只有手工水槽能达到1.2-4.0mm的厚度。这种厚度是机器加工无法完成的，只能采用全手工打造。

NANO TECHNOLOGY

纳米技术是用单个原子,分子制造物质的科学技术, 研究结构尺寸在1至100纳米范围内材料的性质和应用。纳米技术已广泛应用于大部分高科技领域, 而这一次我们将纳米技术应用于水槽上。

Nanotechnology is the science and technology of manufacturing materials with single atoms and molecules. It studies the properties and applications of materials with structural sizes ranging from 1 to 100 nm. Nanotechnology has been widely used in most high-tech fields, and this time we applied nanotechnology to sink.

If the sink is blocked by debris, leaking too slow or difficult to clean up debris, It will affect your healthy. The stainless finish of this kitchen sink drain assembly fits in easily with contemporary kitchen designs.

下水配件往往是人们醉容易忽视，认为只要够排水就可以了，其实不然，下水管是水槽的重要部分，如果制造材质差，下水使用寿命就将大大减少！容易出现断裂漏水现象！同时，如果下水管不具备防臭功能，将不能很好的杜绝病毒和臭气的衍生，会直接影响您和家人的健康。

V-SHAPED DEODORANT DESIGN V型水封防臭设计

下水管无水流或流水较小时，沉水弯里面装满了水，形成一道隔离安全门，杜绝病菌，臭气，爬虫等进入居室或楼上，楼下正负压跑气和长期不用干涸后范围的现象。
